Professional Summary

Senior Software Engineer with over 3.5 years of experience designing and implementing scalable, high-impact backend systems using Java, Spring Boot, and distributed services. Proven track record of driving significant improvements in product engagement, system reliability, and operational efficiency in high-growth technology environments.

Work Experience

Jubilant FoodWorks Limited

Noida, U.P.

Leading QSR Food-Tech company with 160+ tech employees and 5,500+ crore annual revenue

Graduate Engineer Trainee

Jan 2022 – June 2022

- Wrote robust unit and integration tests using JUnit and Mockito, ensuring high code quality and reliability through Checkstyle and SonarQube checks, achieving 93% coverage, significantly reducing production defects.
- Improved a job scheduling system for creating and managing jobs based on cron expressions. Enabled job scheduling, status monitoring, and integrated logging and alerts to track performance and promptly detect issues.

Software Engineer

July 2022 – Present

- Developed a loyalty rewards microservice (streak-based, incentives, gamification) that increased customer engagement by 30% and boosted repeat business by 35%.
- Designed an LDAP-integrated admin panel to manage 200,000+ users and 10,000+ daily earn/burn transactions, reducing manual processes by 40%.
- Engineered a Data Call service using WebRTC, WebSockets, and STUN/TURN, reducing telecom costs by 60% and saving 1.3 crore annually.
- Optimized media streaming (adaptive bitrate, fallback for low networks) to enhance real-time user experience.
- Built and deployed a Rider Incentive calculation service tailored to diverse scenarios and store-specific criteria, improving payment accuracy by 35% and ensuring fair compensation.
- Implemented a circuit breaker pattern to enhance the resilience and stability of the application leading to 40% reduction in downtime.
- Developed an S2S authentication library (SSO), streamlining integration effort by 80% for backend teams.
- Integrated PAYTM Net Banking/UPI into a unified payment platform used by brands like Domino's and Dunkin', and implemented a payment gateway analysis module that increased successful transactions by 25% for 100,000+ daily users.

Technical Skills

Languages: Java, C++, SQL, JavaScript, HTML/CSS

Databases: MySQL, Elasticsearch (Basic), MongoDB, Cassandra

Frameworks/Tools: Spring Boot, Kafka, RabbitMQ, Redis

Education

Birla Institute of Technology, Mesra

Bachelor of Technology in Information Technology (CGPA: 8.2)

Ranchi, Jharkhand

July 2018 – May 2022

Achievements / Leadership

- Received the **Chairperson Award** for significantly improving Rider Incentive payment accuracy while reducing operational costs.
- Received the **Personal Gold Award** for contributions to developing the **Dynamic Loyalty Service**.
- Achieved a podium finish in the company-wide hackathon with the “Common Cart” idea.

Hobbies / Interests

- Chess
- Cricket
- Table Tennis
