Professional Summary

Senior Software Engineer with 4+ years of experience designing and building scalable backend systems using Java and Spring Boot in high-growth food-tech and QSR environments. Proven ability to improve system reliability, reduce operational costs, and drive measurable business impact through performance-oriented microservices.

Work Experience

Jubilant FoodWorks Limited

Noida, U.P.

Leading QSR Food-Tech company with 160+ tech employees and 5,500+ crore annual revenue

Software Engineer

July 2022 – Present

Loyalty Rewards Service

- Developed a loyalty rewards microservice (streak-based, incentives, gamification) that increased customer engagement by 30% and boosted repeat business by 35%.

Data Call Service

- Engineered a Data Call service using WebRTC, WebSockets, and STUN/TURN, reducing telecom costs by 60% and saving INR 1.3 crore annually.
- Optimized media streaming (adaptive bitrate, fallback for low networks) to enhance real-time user experience.

Delivery Management System

- Built and deployed a Rider Incentive calculation service tailored to diverse scenarios and store-specific criteria, improving payment accuracy by 35% and ensuring fair compensation.
- Implemented a circuit breaker to enhance system resilience and stability, leading to a 40% reduction in downtime.

Single Sign On System

- Designed and implemented a centralized SSO service supporting multiple authentication and authorization mechanisms, including LDAP, token, and API key-based access, enabling secure and scalable integration across backend services.
- Developed a server-to-server (S2S) authentication library built on the SSO platform, reducing integration effort for backend teams by 80% and standardizing secure communication across services.

Unified Payment Service

- Integrated PAYTM Net Banking/UPI into a unified payment platform used by brands like Domino's and Dunkin'.
- Implemented a payment gateway analysis module that increased successful transactions by 25% for 100,000+ daily users.

Graduate Engineer Trainee

Jan 2022 – June 2022

- Wrote robust unit and integration tests using JUnit and Mockito, ensuring high code quality and reliability through Checkstyle and SonarQube checks, achieving 93% coverage, significantly reducing production defects.
- Improved a job scheduling system for creating and managing jobs based on cron expressions. Enabled job scheduling, status monitoring, and integrated logging and alerts to track performance and promptly detect issues.

Technical Skills

Languages: Java, C++, SQL, JavaScript, HTML/CSS

Databases: MySQL, Elasticsearch (Basic), MongoDB, Cassandra

Frameworks/Tools: Spring Boot, Kafka, RabbitMQ, Redis

Education

Birla Institute of Technology, Mesra

Bachelor of Technology in Information Technology (CGPA: 8.2)

Ranchi, Jharkhand

July 2018 – May 2022

Achievements / Leadership

- Received the **Chairperson Award** for significantly improving Rider Incentive payment accuracy while reducing operational costs.
- Received the **Personal Gold Award** for contributions to developing the **Dynamic Loyalty Service**.
- Achieved a podium finish in the company-wide hackathon with the "Common Cart" idea.

Hobbies / Interests

- Chess
- Cricket
- Table Tennis
